

Entry Point

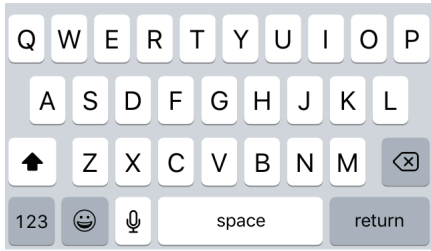

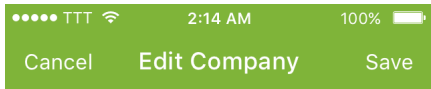

You currently don't have any companies added

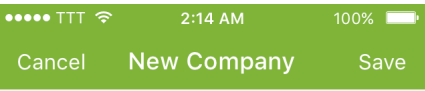

[+Add Company](#)

First screen of your app that begins with an empty state. Tapping on the plus or +Add Company will open the creation modal.

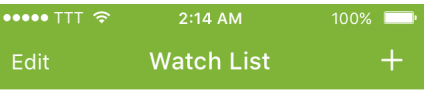

Edit

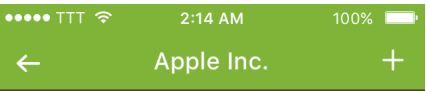

User can delete or edit by tapping on the cell

This opens modally and tapping save will add items on to the list.

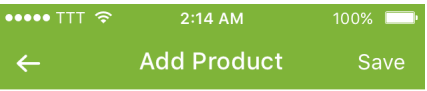

Tapping into a cell will invoke a show segue on the navigation and show you the company details.

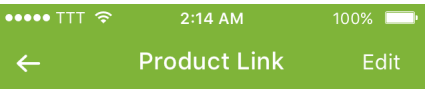

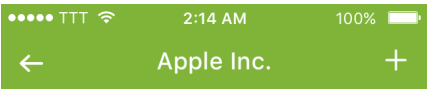

Add a few of this company's products to track.

[+Add Product](#)

This scene is similar to the company's scene, but specific to a product.

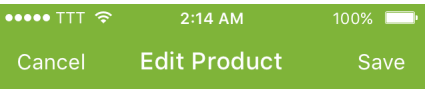

Select MacBook

Order now and get free shipping.

Tapping on the product cell will show product details. Swiping will allow user to edit (like in the company scene)

Tapping on edit will allow you to make changes.
